

Sebin Stanley

Junior DevOps Engineer

Kerala, India | sebinstanley447@gmail.com | [LinkedIn](#) | [GitHub](#) | [Contra](#)

SUMMARY

Junior DevOps engineer who deploys and maintains real applications every day on Linux servers, with Docker, Nginx and CI/CD. AWS Solutions Architect Associate.

EXPERIENCE

Junior DevOps Engineer, Cydez Technologies

Jul 2026 – Present

- Handle daily pull-and-deploy and database migration work across several production apps, including Billex, SMS and HRMS, on manually managed servers.
- Deployed an exam platform end to end: Django on Apache/mod_wsgi, React behind Nginx, Let's Encrypt SSL on both domains.
- Set up a new TWise demo environment: Docker networks and containers, Nginx, SSL, Angular build and deploy, and a GitHub Actions workflow.
- Maintain a shared Nginx reverse proxy serving multiple domains across several Docker networks, including reconnecting it after container rebuilds.
- Diagnose deployments that succeed but don't show changes, and fix the cause.
- Create repositories and deploy internal tools on request.

PROJECTS

Mini DEV: Full-Stack DevOps Environment

[mini-dev](#) | [mini-dev-k8s](#)

AWS · Docker · Kubernetes · GitHub Actions · Terraform · Nginx · PostgreSQL

- Deployed an Angular, ASP.NET Core, PostgreSQL and Nginx stack with Docker Compose on EC2, with a self-hosted GitHub Actions pipeline that health-checks and rolls back failed deploys.
- Rebuilt the AWS network and EC2 setup (VPC, subnets, security groups) in Terraform.
- Ran the same stack on Minikube with deployments, services, ConfigMaps and Secrets, plus a second kubectl pipeline.

MyWeatherApi

github.com/sebin31/myweatherapi

.NET 10 Web API · Docker · GitHub Actions · AWS EC2 · Nginx

- Containerised with a multi-stage Dockerfile and deployed to EC2 (Sydney) through an automated pipeline, with Nginx reverse proxy and an Elastic IP.

AWS Cloud Infrastructure Deployment

EC2 · VPC · S3 · IAM · CloudWatch

- Built and secured a small AWS environment with network isolation, access control and monitoring.

HRMS API Deployment on Linux

Apache · Certbot SSL · systemd

- Deployed the API on Ubuntu with HTTPS and a systemd service so it restarts on its own.

Ubuntu Server Hardening · Network Design

- Hardened a Linux server for baseline security.
- Designed a multi-VLAN office network with ACLs in Cisco Packet Tracer.

SKILLS

Systems: Linux (Ubuntu), Windows Server, systemd, shell

Web & Deploy: Nginx, Apache, Docker, GitHub Actions, Certbot / Let's Encrypt

Cloud: AWS (EC2, VPC, S3, IAM, CloudWatch), Terraform, Kubernetes (Minikube)

Networking: TCP/IP, VLANs, ACLs, Cisco Packet Tracer

CERTIFICATIONS & TRAINING

- **AWS Certified Solutions Architect – Associate**, April 2026 ([verify on Credly](#))
- CCNA training
- Microsoft Azure Fundamentals (AZ-900) training

EDUCATION

B.Tech, Information Technology

Toc H Institute of Science and Technology, Kerala

2024
